

## LOUNGING OBSERVATION CAR LATEST RAILROAD LUXURY

One of the attractive features of the equipment of the Burlington's new trains is found in what is called the lounging observation car at the rear end. It differs from the ordinary observation car in that the principal division of space provides a parlor for women and a club room for men. They are separated by a glass partition. The club room has a buffet, a lounging couch and a bulkhead of seats for card players. The place is furnished with Spanish leather chairs, tables, etc. The buffet is finished in English oak, the windows being of ornamental glass. Between the club room and the women's parlor is a writing room with semi-partitions, which afford privacy. It is finished in Cuban mahogany, and provided with cases of books, writing desks, and cases for stationery.

The observation parlor, also finished in Cuban mahogany, has seats for six persons and occupies "the full width of the car. Then there is the outer platform seven feet long and which will be appreciated because it is enclosed with plate glass. The windows can be lowered if the weather conditions make it desirable and when it is otherwise the occupants are protected.

The doors are of solid statuary bronze and plate glass.

### RAILROAD NOTES—

Santa Fe Officer A. E. Bloxson has been visiting Albuquerque from this city.

Fireman Anderson has come up to the local railroad hospital from Lamy for medical treatment.

Conductor A. F. Youngston went to Raton on No. 8 this morning and brought in No. 1 this afternoon.

Conductor Harry L. Creswick has been chafed up for Conductor R. F. Hays' passenger run for the next sixty days to come.

Poster Jones is winning laurels and drawing pay as night caller at the local yard office till the regulars get in shape for work again.

Lon Sharpe, of the Santa Fe shops at Raton, has left for points in Illinois, Missouri and Kansas. He expects to be gone several weeks.

Conductor W. J. Fugate is enjoying the quietude of home for a few days, his passenger run engaging the time and attention of Conductor James Dougherty.

F. Hal Trimble, a former telegraph operator in Las Vegas relay office, was married to Miss Harriet Magdalene Reed of this city, last Wednesday afternoon in Uvalde, Texas.

Foreman U. S. G. Cunningham, of the bridges and buildings department here, has returned from Maxwell City, at which point the Santa Fe is erecting a cottage for its station agent.

Robert A. Moore, the railroad conductor, a brother of J. E. Moore, of this city, has just been operated on a second time in a hospital at Denver. He is now thought to be in a fair way to ultimate recovery.

A. P. Wolf, the storekeeper at Raton for the Santa Fe, has been promoted to the position of general foreman of the storehouse at Topeka, and will leave within the next day or two

to assume charge of his new position. Mr. Wolf takes the place of H. M. Powell, who has been transferred to a similar position elsewhere.

Robert J. Archer, for some time past employed in the railway mail service out of Albuquerque, and Miss Bertha Swain of the Economist Dry Goods company, were married in the Duke city this week.

H. E. Ray, storekeeper for the Santa Fe at San Bernardino, and W. H. Phillips, division storekeeper, will have combined forces and Mr. Ray has been given charge over them. Mr. Phillips has the title of general foreman.

Switchman H. G. Mohr has tired of his job here and gone to Albuquerque, thinking perhaps that the climate in a lower altitude will be more beneficial to his health. Switchman W. C. Johnson is dodging frogs in his place.

E. A. Davis, superintendent of Pullman service at Albuquerque has received official notice that 85 cars of Elks will pass through that city between July 5 and 9. The number has been gradually increasing from day to day.

Roy Sund, bill clerk at the local freight depot, has been granted a 15-day respite from the desk, which will be occupied by George E. Vigus, who in turn has been relieved for the time being as seal catcher by Fred Kingery.

General Manager J. E. Hurley of the western section of the Santa Fe, who reached Trinidad from La Junta yesterday, never before came so near Las Vegas without running a few miles farther and handshaking with his friends. But it's always business before pleasure with Mr. Hurley.

It is understood that construction work will be commenced in the near future in Albuquerque on a two-story building either adjacent to the Santa Fe freight depot or south of the building now occupied by Gross, Kelly Co., which will be utilized by the Harvey system as a laundry and home for the Alvarado help.

The "Brooklyn Eagle" newspaper special, touring the southwest, the Pacific coast and northwest, with stops at the Seattle exposition and Spokane, will pass through Las Vegas on the way to the Grand Canyon and Los Angeles on July 11. A three-day stop at Colorado Springs is the only lengthy stop to be made by the train before reaching the southwest.

The Santa Fe has recently installed on several sections of the coast lines gasoline section cars as an experiment and if the new cars are as successful as the inventor claims, probably they will be installed throughout the entire system. The motor propelled car is capable of making a speed of 25 or 30 miles an hour, which is an improvement on the car propelled by hand. It is claimed that the greater speed will result in a great saving of time and more than repay for replacing the old cars.

Peter Naskrent, who was arrested in Albuquerque on a charge of embezzlement preferred against him by the management of the Harvey house at La Junta, has been taken back to

that place in the custody of a Santa Fe officer. It is alleged that Naskrent, who was for some time cashier in the Harvey hotel at La Junta, is short in his accounts to the extent of \$150. Naskrent, however, claims that the shortage only amounts to \$50, and that it resulted from playing the stock market. He also claims he was encouraged in dabbling in stocks by the Harvey house manager at La Junta.

The other day, Brakeman E. Ortiz, of this city was hauled over the carpet in an investigation in Albuquerque and given twenty-two demerit marks for some seeming delinquency in duty. "Why, that's nothing," remarked a Las Vegas conductor, to whom the decision of the kangaroo court had been told. "At one time," continued the ticket-puncher, "I had over a hundred demerit marks, more than enough to have had me fired twice and then hired again, but at last I succeeded in working them all off, several of them at a clip."

### Help for Those Who Have Stomach Trouble.

After doctoring for about twelve years for a bad stomach trouble, and spending nearly five hundred dollars for medicine and doctors' fees, I purchased my wife one box of Chamberlain's Stomach and Liver Tablets, which did her so much good that she continued to use them and they have done her more good than all of the medicine I bought before.—Samuel Boyer, Folsom, Iowa. This medicine is for sale by all dealers. Samples free.

### EX-GOVERNOR OTERO DEFENDANT IN SUIT

Santa Fe, N. M., July 2.—In the district court for Santa Fe county, yesterday afternoon, suit was filed by J. H. Fulmer, Jr., of Mishawaka, Indiana, against Ex-Governor Miguel A. Otero, in the capacity of the latter as trustee of the Santa Fe Realty Company which was to have been organized and incorporated. The suit is brought to determine judicially the status of a large amount of real estate acquired for the proposed company, and towards which purchase Fulmer claims to have advanced \$21,577. This real estate includes the Cienega on Palace avenue, the Houghton tract on the south side, 15,000 acres of the De Vargas grant, the Cayetano Lobato grant.

Another suit involving title to real estate, filed yesterday was that of Jose Francisco Duran, et al., vs. George Anton, et al., involving several lots and a house on Hillside avenue, upon which Mrs. Adelina Keachie had a mortgage.

Suit has also been filed by John W. Snyder vs. Robert Law, president of the New Mexico Central railroad, to recover on a judgment for \$413, with interest now amounting to \$439.85 and which was given in Cook county, Illinois.

### INTERESTING MANUAL ON DRY FARMING

A most important addition to the agricultural literature of the world has just been issued by the Dry Farming Congress in the form of a "Handbook of Information," which contains the official report of the proceedings of the third sessions of the organization which was known as the Trans-Missouri Dry Farming Congress prior to the convention at Cheyenne, Wyo., last February. This report is a comprehensive review of the work of the congress and contains, in addition to the addresses and papers delivered before the convention at Cheyenne, the complete report of Statistician W. H. Olin, in which a review of the actual results of dry farming throughout the world, is given, together with suggestions and recommendations to dry farmers that will be found invaluable to those hardy settlers who are invading the public lands of the west and transforming the former so-called desert into productive farms.

The contents of the book are conveniently classified and indexed so that any reference to any subject relating to dry farming may be found without delay. The book, issued as a handbook of information to farmers, is sent without extra charge to the members of the congress in good standing and may be purchased for one dollar a copy by others interested in the subject. It is published by the Dry Farming Congress which will hold its fourth session and the second international exposition of dry farm products at Billings, Mont., Oct. 25-29, 1909. Those who desire the book may send \$1 to Secretary John T. Burns of the congress for membership. The members receive not only the handbook but the semi-monthly Dry Farming Congress Bulletin, the only official "dry farming" newspaper published in the world.

## PLOW THAT WILL CUT DOWN TREES INVENTED

A new type of plow that cuts roots to pieces and tears them up is in operation upon newly cleared mesquite lands in southwest Texas. This plow was designed for the special purpose of breaking up the new lands which are being rapidly cleared of their heavy growth of mesquite and other small trees and bushes. The cutting attachment to the plow is capable of smoothly slicing in two roots and stumps up to five inches in diameter.

Some of the farming tracts that have been opened up are of enormous area. It is necessary to clear the land of the thick growth of smaller trees and shrubs. It had been the custom in the past to employ Mexican laborers to do the clearing and grubbing, a slow and expensive process. The fact that these roots and stumps upon much of this land rarely exceed five inches in diameter did not lessen the work of the laborers to any appreciable degree.

Each plow or implement consists of three turning plows, forming one gang, and suspended on an angle frame. Two of these gangs make up the plowing equipment of a traction engine, and have a cutting width of seven feet for every round that is made by the engine. The engines in

use are not more than fifty-horse power nor less than forty-horse power. One of these outfits breaks from ten to twelve acres per day. It is estimated that the average cost per day for operating one of the outfits is about \$35.

### HAS ORIGINAL BILLS OF SALE FOR SLAVES

DeSoto H. Grant, the Douglas avenue jeweler, has in his possession some very interesting documents as relics of slave holding times in the south. The papers include a number of bills of sale of negroes, bought and sold by his father, John Grant, who at one time was a prominent physician of Tennessee and a large slaveholder. The bills of sale show that slaves sold as high as \$1,500 apiece, and as low as \$350. In each instance the bill of sale recited the age, sex and physical condition of the negroes bought or sold. The papers are dated in 1862-3 and are yellow with age. Mr. Grant prizes them very highly for their historic value.

With every closet in the house containing some of her clothes, a woman always says that she has nothing to wear.

### The Tenderfoot Farmer

It was one of these experimental farmers, who put green spectacles on his cow and fed her shavings. His theory was that it didn't matter what the cow ate so long as she was fed. The questions of digestion and nourishment had not entered into his calculations.

It's only a "tenderfoot" farmer that would try such an experiment with a cow. But many a farmer feeds himself regardless of digestion and nutrition. He might almost as well eat shavings for all the good he gets out of his food. The result is that the stomach grows "weak" the action of the organs of digestion and nutrition are impaired and the man suffers the miseries of dyspepsia and the agonies of nervousness.

To strengthen the stomach, restore the activity of the organs of digestion and nutrition and brace up the nerves, use Dr. Pierce's Golden Medical Discovery. It is an untailing remedy, and has the confidence of physicians as well as the praise of thousands healed by its use.

In the strictest sense "Golden Medical Discovery" is a temperance medicine. It contains neither intoxicants nor narcotics, and is as free from alcohol as from opium, cocaine and other dangerous drugs. All ingredients printed on its outside wrapper.

Don't let a dealer delude you for his own profit. There is no medicine for stomach, liver and blood "just as good" as "Golden Medical Discovery."

### YOU TAKE NO RISK.

If you suffer constipation in any form, we believe we can furnish you permanent relief. If we fail, the medicine will cost you nothing. We want you to try Rexall Orderlies. They are eaten like candy, do not gripe or purge, cause no inconvenience whatever, and can be taken any time day or night. Try them today at our risk. Two sizes, 10c and 25c.

E. G. Murphey, The Rexall Store.

Nothing causes a young widow to sit up and take notice quicker than the discovery that another widow is on the trail of the man she has spotted for No. 2.

### Try This for Dessert.

Dissolve one package of any flavored JELL-O in one pint of boiling water. When partly congealed, beat until light adding one cup whipped cream and six crushed macaroons. Whip all together thoroughly and pour it into a mold or bowl. When cool, it will jellify and may be served with whipped cream or any good pudding sauce.

The JELL-O costs 10c per package and can be obtained at any good grocers.

If George Washington never told a lie he couldn't have been much of a fisherman.

### Sees Mother Grow Young.

"It would be hard to overstate the wonderful change in my mother since she began to use Electric Bitters," writes Mrs. W. L. Gilpatrick of Danforth, Me. "Although past 70 she seems really to be growing young again. She suffered untold misery from dyspepsia for 20 years. At last she could neither eat, drink nor sleep. Doctors gave her up and all remedies failed till Electric Bitters worked such wonders for her health." They invigorate all vital organs, cure liver and kidney troubles, induce sleep, impart strength and appetite. Only 50c at all druggists.

The only cure for old age is to die young.

### Proper Treatment for Dysentery and Diarrhoea.

The great mortality from dysentery and diarrhoea is due to a lack of proper treatment at the first stages of the disease. Chamberlain's Colic, Cholera and Diarrhoea Remedy is a reliable and effective medicine, and when given in reasonable time will prevent any dangerous consequences. It has been in use for many years and has always met with unvarying success. For sale by all dealers.

## July 4th IS A DAY OF CELEBRATION.

picnics, etc. It is, also, usually, a hot, sultry day, on which the coolest garments possible are none to cool.

White Lawn or Batiste Waists with White Duck or Pique Skirts make ideal costumes for any and all summer occasions. We have an excellent variety of these Popular garments and will save you one fourth to one-third of the usual price.
